Annex B: Material categories and requirements

Supplier Documentation and Release Policy · Version 7.0

This annex is published for reference only. The ERP is the authoritative record of what each material requires and of the category it belongs to. Where this annex and the ERP disagree, the ERP is correct and this annex is out of date.

Material code	Description	Required standard	Category
MAT-4471	Whey protein concentrate 80%	ISO 22000	dairy protein powders
MAT-4472	Skimmed milk powder	ISO 22000	dairy protein powders
MAT-5108	Wheat flour, type 550	ISO 22000	cereal and grain ingredients
MAT-5112	Rolled oats	ISO 22000	cereal and grain ingredients
MAT-6301	Glucose syrup DE 40	ISO 22000	sweeteners and syrups
MAT-6320	Invert sugar syrup	ISO 22000	sweeteners and syrups
MAT-7702	Printed laminate film, 120 micron	BRCGS Packaging Materials	flexible packaging films
MAT-7715	PET preform, 28mm neck	BRCGS Packaging Materials	rigid packaging containers
MAT-8890	Fresh apples, Gala	GLOBALG.A.P.	fresh produce
MAT-8902	Almonds, raw, kernel	GLOBALG.A.P.	tree nuts

The category column is what a certified scope is assessed against under section 10 of the policy. It is not a description of the material and it is not printed on any certificate.

A category holds more than one material. Whey protein concentrate and skimmed milk powder are both dairy protein powders; wheat flour and rolled oats are both cereal and grain ingredients; a PET preform and a closure are both rigid packaging containers. A scope that covers the category covers every material in it, and section 19 of the policy records how each category has been assessed.
